- 200+** Trucks / Day

Bigfoot Facility

4606 FM 2504
Poteet, TX 78065

- 2MM** Annual Tons Mine Capacity
- 9K** Tons Vertical Storage
- 3** Dedicated Truck Loadouts
- 10** Minute Avg. Load Time
- 300+** Trucks / Day

BLACK MOUNTAIN SAND

EAGLE FORD SHALE

Winter Garden White™

100 MESH

FEATURES

Based in Dimmit and Atascosa Counties, the Winter Garden White™ sand from our Dimmit and Bigfoot Mines meets or exceeds the API standards for fracing. Our proven K factor resistance enables for high pressure pumping without compromising the integrity of the sand. This high-quality proppant meets the rigorous demands of the industry and allows our frac sand customers to focus on their core competency – hydrocarbon production. Using in-basin sand can reduce the total cost of drilling and completing a well and increase the return on investment.

PHYSICAL PROPERTIES	100M Winter Garden White™
Crush Resistance - K Factor	8K
Specific Gravity	2.66
Bulk Density (lb/ft3)	89
Bulk Density (g/cm3)	1.4
Krumbein Roundness	0.6
Krumbein Sphericity	0.7
Acid Solubility (wt %)	<3.0
Turbidity (NTU)	<250
