BLACK MOUNTAIN SAND

## EAGLE FORD SHALE

# Winter Garden White<sup>®</sup> 100 MESH

### FEATURES

Based in Dimmit and Atascosa Counties, the Winter Garden White<sup>®</sup> sand from our Dimmit and Bigfoot Mines meets or exceeds the API standards for fracing. Our proven K factor resistance enables for high pressure pumping without compromising the integrity of the sand. This high-quality proppant meets the rigorous demands of the industry and allows our frac sand customers to focus on their core competency – hydrocarbon production. Using in-basin sand can reduce the total cost of drilling and completing a well and increase the return on investment.
